

## WILD GECKOS

### WELCOME TO OUR JUNGLE

Wild Geckos are hungry for success and fortune. This project aims to make the crypto world and games more entertaining and productive. There is a collection of NFTs drawn by skilled artists and with sophisticated tools. Digital collectibles born on the Solana Blockchain. Owning a Wild Gecko gives you access to play the game and gain tokens.

Our team is focusing on development of **PLAY2EARN** concept. We are promising our community a solid plan on making the weekly earnings stable and growing. Our main goal is to expand and seek the long term.

Nowadays, the market of cryptocurrencies and gaming knows a change and huge turn positively. Accelerating consumer inflation, comparative profitability and the rising popularity of cryptocurrencies remain the main factors that contribute to the industry's constant growth. Search engine inquiries for cryptocurrencies are breaking records, with Bitcoin, Ethereum and Solana being among the most profitable assets in the history of the financial market.

More and more people around the world are using cryptocurrencies for their daily transactions, while many companies are making significant advances into blockchain by creating their own NFT collections and tokenizing their assets. NFTs have become the subject of the whole industry since 2021. The economy for play-to-earn blockchain games is growing at an exponential rate. Wild geckos Game will build a first-of-its-kind ecosystem that provides a seamless experience for gamers and developers looking to participate in the lucrative opportunities present in play-to-earn. The Wild geckos Game white paper provides insights into the current market for online games and the growing relevance of blockchain and play-to-earn games. The field also knows few gaps here and there. In contrary, our team has plans to resolve these few issues.

The solution will address the key gaps in the current play-to-earn ecosystem and the team has outlined a realistic roadmap to gradually build and deploy this solution to the market. Moreover, our token will play a critical role in the game platform and this paper will also detail the economics and role of this token.

## **Our vision**

Blockchain gaming, along with the play-to-earn movement, Players have always been the central driving force behind any successful game and now they can be rewarded with crypto for the contributions that they make to their gaming community. We aim to establish Wild Geckos as a leader in this revolutionary gaming world. We believe that now is the time for blockchain games to feel like the beloved video games that we should play more.

Wild Geckos will offer an enjoyable and profitable gaming experience, without complications. We are focusing on building a strong community and

listening to feedback right from the beginning. We do not intend to rush any aspect of this project, our vision for Wild Geckos is endless and for the long term.

We will be minting our collection, kicking off development of our game, releasing staking information, and dropping some key partnerships along the way. NFT holders will also receive exclusive rights to an early token sale.

## Play2earn problems

To survive and thrive in the fast-paced game industry, understanding the struggles and figuring out how to solve them is the only choice for any game studio. After researching popular games, here are.

<ul style="list-style-type: none"><li>• Players have to pay an <i>"entry fee"</i>, making the game <i>"high risk"</i> if it is a scam project. This entry fee also becomes a barrier for new players to enter the game when it goes up due to the token price surge.</li></ul>
<ul style="list-style-type: none"><li>• The gameplay is focused on the earning aspect rather than making it fun, which makes the overall experience poor.</li><li>• A handful of game studios offer either a mobile version or a desktop version, but not both.</li><li>• The high gas fee rate in blockchain games is a burden on the players.</li></ul>
<ul style="list-style-type: none"><li>• Players can not use their stake tokens or <b>NFTs</b> to perform in-game tasks once they are added to the staking pools.</li></ul>

It is challenging for **blockchain game** developers to enter the traditional game market because of several reasons:

- Traditional games do not support the mobile version or desktop app version.
- There is a limited integration of payment methods/ gateways in traditional games.
- Traditional gamers are not familiar with tokens or **NFTs**. Most of them find it to be complicated technology.
- Popular game stores including Apple store and Google Play store ban games that feature crypto/NFT exchanges.

On top of that, the **blockchain game** itself carries potential risks such as:

- The inflation of the tokens and NFTs can trigger the decrease and collapse of the in-game economy. Users end up leaving the game quickly when the crisis peaks out.
- The game publishers encounter a real headache of high gas fee rate.

## **NFT Game solutions**

### **1. Free to play**

Let gamers play for free before actually spending on it. In other words, the game does not impose any upfront cost. Players can experience a full-fledged core game without any initial investment. Once players have signed up, the pay-to-earn model encourages player loyalty since players will generally earn more by playing more. For this reason, **Monsterra NFT game** is expected to reach a larger audience of players than most other **NFT games**.

### **2. Play for fun**

Although earning is an integral part of any P2E games, **the Game** still focuses on building an exciting and inspiring gameplay to elevate the fun experience. All the in-game activities such as hatching, breeding, farming, etc follow the "*play for fun*" orientation to let players enjoy their moments.

### **3. Free to earn**

Free players can earn huge incentives using strategic plans in their battles which makes their playing time become much more worthy. Without any upfront investment, players can have enough assets to start playing and farming.

### **4. Balanced game mechanism**

**Monstrance P2E Game** is equipped with anti-inflation mechanic structures. The developers have created a variety of token utilities, built an intelligent token burning mechanism and land plots fusion mechanisms to solve

the tokenomic problems - which all contribute to maintaining a balanced in-game economy.

## **5. Balance in Competition**

**Wild Geckos** ecosystem is designed to support various players, from crypto experts to non-crypto players. All players will have fascinating experiences wandering in the **Wild Geckos universe**

## **6. Expensive gas fee solution**

To solve the gas fee barrier problem, **Wild Geckos** decides not to charge any gas fee when players first start the game. They will only need to pay the transaction fee when converting their assets into NFT items.

With their digital assets such as tokens and NFTs assets, the players can do either of the following:

- Reduce the gas fee by staking their tokens & NFTs. Note: Players can still use their NFT in the off-chain in-game activities even when they are added to the staking pools.
- Pay the gas fee separately for each transaction related to activities such as breeding, evolving, hatching, etc.

## **OUR GAME**

Wild Geckos is an enchanting role-playing blockchain game. It is being built on Solana for its near instant transaction speed and almost zero fees. The game will be playable in app form, launching on PC, Mac, Android, and eventually iOS. All in-game items and creatures are blockchain based tokens and NFTs. Wild Geckos visuals and gameplay are completely original and inspired by classics like Zelda, Pokemon and Pacman. Players will be immersed in a mystical jungle and spend many relaxing hours raising creatures called Ozzy. Most excitingly, players and Ozzy can work together to be rewarded with cryptocurrency for hunting, exploring, crafting, breeding, battling, and more.

## **Play2Earn**

How to earn rewards

- Battle between Players
- finding fruits
- Hunting
- Craft and Sell Rare NFT items
- Explore to Find Rare NFT items
- Breed Rare Wild Geckos
- Wild Geckos Marketplace
- Powerful Referral System
- Buy and Sell Lands
- Wild Geckos Token Staking Rewards
- Treasury Rewards<sup>4</sup>

## **Tokenomics**

Wild Geckos Token (WGK) will be deeply tied into the game's ecosystem. WGK will eventually become deflationary and players/holders will be incentivized to hold, causing natural price growth, this will be achieved in the following ways:

- WGK will be required as the primary form of in-game currency. Players will need WGK to pay for new Wild Geckos, breeding fees, Sage fees, Wandering Trader items, land plots, Marketplace purchases, and more. Additionally, the “the Treasury” will eventually buy and burn WGK, making it naturally deflationary as the ecosystem grows.

- WGK will eventually provide holders with the opportunity to actively participate in the future directions of the game! The project will slowly and safely to decentralized online game. WGK holders will be able to participate in

governance voting in the future as part of an upcoming DAO/DAC, allowing them to shape the future of Wild Geckos.

- WGK will eventually present holders with staking rewards when locked. As holders lock their WGK they will decrease the circulating supply and will be rewarded with additional WGK.

### Let me introduce you "Ozzy"

A baby Gecko (Ozzy) climbs out of his egg, hidden above the tree in a tropical rain forest of Madagascar. He used his head to break out of the hard shell of the egg. Now he must explore his surroundings.

Ozzy is a "*Phelsuma grandis*", but his claws and the scales along his back make him look a lot like a tiny slimy alligator. In the rain forest, the sunlight filters through the leafy treetops and bounces off his green skin. He shines like a jewel.

Other Geckos crawl around the leaves of the tree. They are Little Gecko's brothers and sisters. Soon the forest floor is covered with baby Geckos. They all want to explore their new world.

An eagle sits on a branch high above the ground. It watches the geckos looking for food. Geckos are not raised by a mother or father gecko. Young geckos are born knowing what they have to do to survive in the rain jungle. Knowing how to survive without being told is called instinct.

Ozzy is dazzled by all of the interesting sounds of the rain forest. He hears the water falling, and she hears the birds calling to each other through the wood.

Now Ozzy is hungry. He leads a group of geckos across a trail of leaves. A quick movement catches his eye. In front of Ozzy, an army of worms. Gulp!

The little gecko extends his arm and snaps up her first meal: a tasty worm. He eats a few more before moving on.

The geckos climb up a big tree near the river. His claws let go of the tree branch. Little Gecko is falling! He hits the water with a splash. Ozzy's tail comes in handy. It helps his balance as he walks, swims, or runs. Some Geckos use their tails to escape from enemies. The tail breaks off at a special point and keeps twitching as the Gecko gets away. Don't worry! Soon the Gecko will grow a new tail. He is a very good swimmer. He paddles toward a water lily and climbs on the leaf. His long legs carry his from lily pad to lily pad. He reaches the shore and keeps on running. Little Gecko hops over to a fallen tree trunk. All the other Geckos are gone. Little Gecko seems to be alone now, but he is safe.

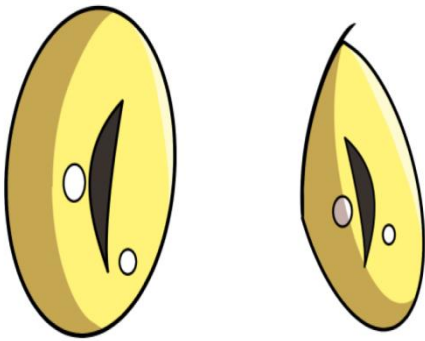

Suddenly, Ozzy discovers he is not alone, he is surrounded by more strange animals and not at all safe. He notices a forest animal that looks like a pig with a long snout. It was a tapir! Ozzy reacts quickly, leaps onto a nearby tree and scampers quickly across the branch in order to escape from danger. He jumps from tree to tree looking for insects, he needs to find more food and a safe place to rest.

The Gecko is safe at last! But wait. There is a snake hissing loudly and starts moving towards him. Ozzy starts running away and realizes it will not be easy surviving in this jungle. He is in big trouble...

## Gecko Rarity

The rarity of each gecko will be defined with a combination of skin color, cloths, Accessories and mainly by the Eyes Colors and Shapes, Which will be an X-factor in all stages of our game.

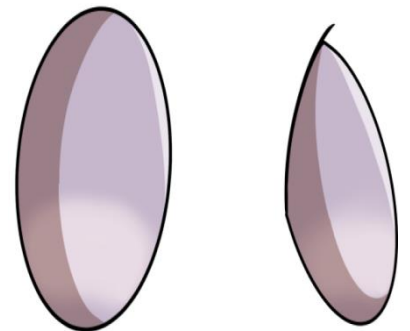

Gecko Eyes

35% chances

Byakugan

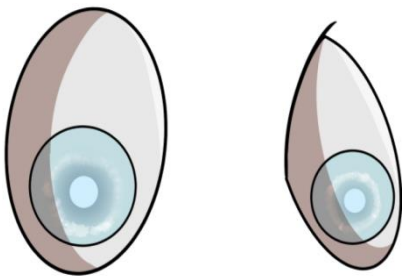

15% Chances

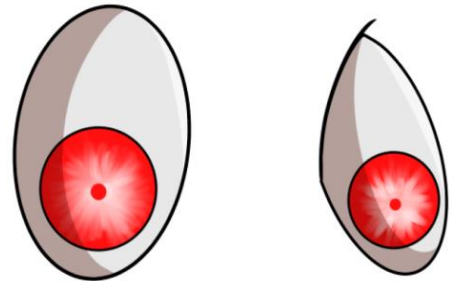

Sage Eyes

## **Why Our NFTs**

Behind Wild Geckos P2E game, there is a an experienced team that has a respectable amount of experience in the crypto-world and P2E gaming Field, so we know exactly what we need to do in order to succeed, and most importantly keep our NFTs holders satisfied by keeping the daily rewards stable all of the time. For that our team does have a modern strategy which they come up with by watching other giant P2E games that unfortunately couldn't make it because of the instability of their game economy and their Tokenomics.

By holding our NFTs, Holders will have an early access to the Wild Geckos (WG) token and also to the land sales, thus they will be an important part of our decentralized ecosystem and also will give them the right to vote throughout the whole process along some other benefits that will be decided later on in the next stages of the game.

## **Some Samples**

## **Game Characters samples**

### Lined gecko

High level of stamina

He lives in forests and has high endurance, develops quickly, adapts to the toughest conditions, and can live twice its life span.

SPEED	70%
SKILLS	65%
STAMINA	90%
POWER	50%

### Electric blue gecko

Strong and shy

Very rare, loves to live in the rainforests, shy, needs a lot of love and attention, and when he gets angry, he gets angry because his electrical charges are very efficient.

SPEED	98%
SKILLS	97%
STAMINA	30%
POWER	100%

### Moorish gecko

Common gecko

He is A robust species, long, its tubercles are enlarged and give the species a spiny armor appearance.

SPEED	65%
SKILLS	65%
STAMINA	55%
POWER	71%

### leopard gecko

fast & agile

Likes to live in rocky dry grassland and desert, its high Skills enables it to move quickly and with high accuracy, and it lives in high altitudes

SPEED	90%
SKILLS	80%
STAMINA	60%
POWER	50%

**Lands**

The land of wild geckos will be divided into four main categories, each one of them you will find a certain type of wild geckos in which they thrive the best and where they have developed a specific type of lifestyle in order to survive and compete with other geckos and species.

There will be

The Sahara desert

Rain forest

The Big City

...
